SUMMARY

AI Engineer with 4+ years building autonomous agents, conversational and speech AI, and fine tuned LLMs for production, and securing them through red teaming and threat modeling. I turn manual business processes into reliable agentic systems, from multi agent RAG platforms to an autonomous QA agent that cut multi hour test cycles to minutes.

EXPERIENCE

AI Software Engineer, Ebryx · client BlueRock.io Oct 2025 to Present

- Built an autonomous QA agent that self qualifies NOVA microhypervisor builds across 29 hardware configurations and cloud bare metal, cutting multi hour supervised cycles to minutes.
- Shipped it as a Slack bot with natural language commands, budget guardrails and failure aware retries that cut cloud spend and flaky reruns.
- Ran adversarial testing and threat modeling on LLMs, agentic frameworks and MCP systems, uncovering real attack vectors before they could be exploited.
- Added automated AI security scanning to LLM deployments, replacing periodic manual review with checks on every build.

AI Software Engineer, Emumba Mar 2025 to Sep 2025

- Developed Genie Mentor, an open source multi agent RAG onboarding platform on AutoGen that cut senior engineer support hours by 50%+.
- Designed a planner, retriever, executor, evaluator and editor workflow over MCP tools for GitHub, Notion and Confluence, unifying 3 silos into one query path.
- Fine tuned Qwen 2.5 3B and Mistral 7B for function calling: LoRA SFT took the 3B model from 0% to 100% executable tool calls and 98.8% correct tool selection on held out data.
- Built a DSPy evaluation and prompt optimization workflow, and a GRPO pipeline with custom rewards that reached 99% format compliance for cited RAG answers.

AI Software Engineer, Afiniti Jul 2023 to Mar 2025

- Built STT pipelines on Canary-1B and Whisper under 5% WER, with domain specific validation for NER and numerical accuracy.
- Deployed intent, sentiment, emotion, summarization and offer detection models at 95%+ accuracy, automating manual call review.
- Cut data labeling turnaround by ~50% with Mistral and LLaMA-3.
- Built a voice to voice support assistant that resolves customer complaints 60% faster than human agents, escalating to a person when needed.
- Built a LangChain + Phi-3 support assistant demoed to Salesforce, and a 96% accurate telecom churn model.

R&D Fellow, CureMD Aug 2022 to Apr 2023

- Built a clinical decision support system validating cancer treatment plans against NCCN guidelines through a machine readable knowledge graph that doubles as a reusable clinical knowledge base.

OPEN SOURCE

function-calling-sft-qwen3b: LoRA SFT of Qwen2.5 3B on xLAM: 0% to 100% executable tool calls and 98.8% correct tool selection on held out data.

grpo-rag-citations-qwen3b: GRPO with four custom rewards teaching a 3B model to cite its source, reaching 99% format compliance.

genie-mentor-agent: Multi agent RAG platform on AutoGen and MCP: built the planner and refiner, retrieval, evaluation and observability.

rag-prompt-tuning-DSPy: Standard, hand written and DSPy optimized RAG prompts benchmarked for similarity and hallucination.

a2a_attack: Security POC of prompt injection, context poisoning, privilege escalation and lateral movement in an agent to agent chain, with defenses.

VOICE_ASSISTANT: Voice to voice support assistant with Whisper, GPT-4o and gTTS, empathetic replies and escalation to a human agent.

SKILLS

Agentic frameworks: AutoGen, CrewAI, LangChain, Google ADK, OpenAI Agents SDK, MCP

AI / ML: NLP and NLU, LLMs, STT / TTS, Multi agent systems, RAG, Prompt engineering, Fine tuning, Tool calling, Reinforcement learning (GRPO), MLOps

AI security: AI infrastructure security, Adversarial AI, Red teaming, Threat modeling

Frameworks: TensorFlow, PyTorch, vLLM, Transformers, DSPy, FastAPI, scikit learn

Data: Pinecone, Qdrant, ChromaDB, PostgreSQL, MySQL, NumPy, Pandas

Languages: Python, C++, OOP and design patterns

Cloud and DevOps: AWS, Docker, Git, REST APIs

EDUCATION

BS Computer Science, FAST National University of Computer and Emerging Sciences (FAST NUCES) Aug 2019 to Jun 2023
